

Superior Pressure, Seamless Supply.

**PRESSURE BOOSTER
PUMPS**

EUFM PRESSURE BOOSTER PUMPS

technical data

Power Range	0.75 kW / 1.5 kW
Degree of Protection	IP 44
Motor	Single Phase 230V +5%, 50Hz 2880 RPM, AC Supply
Flow Q	Max. 166 LPM
Head H	Max. 60 meters
Liquid Temp.	Max. 90 C°

key advantages

Automatic On/Off Operation

- Smart pressure sensing enables automatic start and stop based on water demand, ensuring convenience and efficiency.

Advanced Thermal Overload Protection (TOP)

- Built-in TOP safeguards the motor from overheating, enhancing the system’s safety and extending motor life.

Anti-Corrosive Coated Cast Iron Components

- Provides superior protection against corrosion for long-term reliability, even in challenging water conditions.

Copper Winding with High-Grade Insulation

- Offers exceptional electrical safety, efficient performance, and long-term reliability.
