

SHRIDEV

Built for Emergencies. Trusted for Safety.

FIRE FIGHTING PUMPS

EUFM FIRE FIGHTING PUMPS

technical data

Power Range	2.2 kW - 11.2 kW (3 - 15 HP)
Version	Three Phase, 380-415V, 50 Hz AC Supply
Speed	2880 RPM
Max. Total Head	Up to 70 Mtr.
Max. Flow Rate	Up to 2200 LPM
Max. Suction Lift	7 Mtr.
Duty Type	S1 (Continuous Duty)
Direction of Rotation	Electrically Reversible (Three Phase)

key advantages

High-Performance Hydraulic Design

- Efficient impeller and casing design ensures strong water discharge.
- Delivers consistent pressure across the entire safety network.

Reliable Electric & Diesel Options

- Electric motors are designed for continuous duty operation.
- Diesel engines come with strong performance, stable RPM, and essential safety mechanisms.

Intelligent & Automatic Control System

- Auto start and stop based on pressure changes.
- Remote monitoring options can be provided if required.

Safety & Protection

- Overload protection, dry-run protection, phase failure safety.
- Diesel engine safeguards such as low oil pressure, high temperature, and overspeed shut-down.
