

SHRIDEV

Built Tough for Continuous Performance.

INLINE WATER PUMPS

EUFM INLINE WATER PUMPS

technical data

Feature	Performance Range
Power	3.0 HP to 30.0 HP
Voltage	380V–415V (Three Phase)
Maximum Head	128 Meters
Maximum Discharge	5100 LPM
Speed	2900 RPM

key advantages

- High hydraulic efficiency with optimized multistage stainless steel impellers
- Laser-welded stainless steel impellers and diffusers reducing internal friction
- Cartridge-type mechanical seal for quick replacement and leak-proof operation
- Industrial-grade TEFC motor designed for continuous S1 duty
- Corrosion-resistant stainless steel fluid path suitable for slightly aggressive liquids
- Compact vertical footprint for space-saving installations
- Low vibration and quiet operation suitable for commercial environments
